Sir:

In answer to your letter of 15th instant in which you advise me of the Committee's disallowance of bill of John Wanless, for one set "Grand Army", I respectfully invite your attention to section 1449, Revised Statutes of the U.S., 2^d Edition, 1848.

This section was fully discussed by the Director, Hon. N. L. Dodge and myself, during the recent visit of the former gentleman to this city, and the opinion was expressed that a purchase of the nature of the one in

Sir:

I transmit herewith an official report of the gross yield of the mines of this State during the fiscal year ending June 30/49. During the year 1844-8 the gross yield was \$44,646,863.83

During the year 1848-9 the gross yield was \$19,305,443.94

showing a decrease in production \$28,341,389.86

The present outlook, however, is that the product will be greatly increased during the current year.

Sir:

In answer to your letter of August 29th 1879, in which you request me to procure a statement showing the value and weight of Gold and Silver separately, handled by the several mines in this State, I beg to say that it is impossible to furnish you with the desired data; it is even out of the power of the State Controller to do so.

From the larger mining companies I would have no difficulty to procure the figures, but there are innumerable small mines which are only worked periodically, and the addresses of their owners, in many instances, are unknown.

United States Mint, Carson, Nevada,

SUPERINTENDENT'S OFFICE,

The Controller's report which I recently transmitted to you, is as detailed a statement of this State's mining product as can be had. -

The Department preferred a similar request a few years since, yet nothing could be done in the matter but to make a careful estimate, which resulted in ascertaining that about forty five (45) percent of the product is Gold. -

Greatly regretting my inability to fully comply with your wishes in this particular,

Sir:—For your information
I hereby furnish you statement
of the capacity of our Refinery—
worked with its reduced force
as employed therein at the time
of suspension, together with such
other facts as may be of interest
in connection with the subject.

I claim that the bullion
now in my vault, with what we
may reasonably look for during the
remaining three months & a half of
the present fiscal year, will be
sufficient to keep the refinery

1 The Mint of the United States at Carson, Nevada, 2

MELTER AND REFINER'S OFFICE,

....., 18

moving briskly up to the time required for the Annual Clean up. which will occupy the last ten or fifteen days of the month of June.

My balance of Silver bullion at close of business 15th inst was 287.049.53 standard ounces, with

8.449.729 standard ounces of Gold upwards of 200,000 ounces of this bullion will have to go through the refinery. - a portion of it say 20,000 ounces is of such a character (very base - copper) that it will be necessary to pass it twice through the refinery - it being impossible to prevent such bullion from carrying

The Mint of the United States at Carson, Nevada,

MELTER AND REFINER'S OFFICE,

18

goed over with the silver solution while the copper is present. a second operation will be required to finish this portion.

It will be borne in mind this accumulation of 207,000 ounces represents the amount of four months purchases. — On this basis the three months remaining of the fiscal year should bring say 150,000 ounces more, making a total of say 357,000 ounces to be passed through the refinery in three months from the present time —

At the time of suspension &

The Mint of the United States at Carson, Nevada.

MELTER AND REFINER'S OFFICE,

, 18

had but three men on the Refinery
Roll - who did all the work in
that Room, with the assistance of
a man, sometimes two men, from
the Melting Room. We worked
but one side of the Refinery with
that force, which is about all I
can comfortably do, - having steam
in the reducing houses only up
to four o'clock P.M. - This enables
me to pass through the Refinery
three charges of 5,000 lbs each, and
two charges - on alternate weeks.
it requiring three days to reduce
the silver in each house, with
steam eight hours per day.

The Mint of the United States at Carson, Nevada, 5

MELTER AND REFINER'S OFFICE,

....., 18

working in this manner we get through 25.000 ozs in two weeks or say 50.000 per month. By slightly increasing the working force and running both sides that is both sets of pots and the four roasting houses this amount may be doubled thus parting 100.000 ozs per mo.

Thus you will see we will be kept busy in the refinery working the last amount named up to the time of the clean up.

The time has been when as much as 300.000 ounces have been operated upon in a month, but

The Mint of the United States at Carson, Nevada, ^{b.}

MELTER AND REFINER'S OFFICE,

18

at such time the force was very large and steam was kept up till midnight.

In my judgment it seems most wise to work 100,000 ounces per month, which will keep the four houses going every day remaining of the fiscal year up to 4 P.M. - rather than to put on a large force of new men - unacquainted with the duties of the place, and rush the whole amount through in a month or six weeks. - The difference in expense cannot be great, and it would be much to the advantage of the suspended workmen as well as my own interests.

Very Respectfully

The Mints ~~Organ~~ of the United States;
Your Petitioners, residents of the State of
Nevada, Employees ^{and Ex.} Employees of
the United States Mint, Situated ^{and} Located
in Carson City, Ormsby County, Nevada.

Would respectfully represent, That
within the past four years we have been
denied our just dues, or rather our regular
monthly pay - having been suspended at
various times ^{and} days within the time
specified above, to our detriment ^{and} loss.

That we have always been ready ^{and}
willing, ^{and} held ourselves subject to the order
of the Superintendent of the mint, or his
authorized agent.

That we deem it unjust that the laboring
portion of the employees of the mint should
be held to appear at roll call, ^{and} informed
that their services were not needed for the
day, - while clerks ^{and} other attaches of
the mint - performed no service, but received
their regular salary.

That while we recognize the authority of
the superintendent, to hire ^{and} discharge
at will, - we do not think he has a right
to demand our attendance, ^{and} hold us
in obedience without an equivalent therefor.

The foregoing petition sets forth the facts as understood them of the condition of the Laramie mine. The "laboring employees" are kept waiting for orders when do not come and great hardship ensues with an absolute dismissal, the Employees want such other facilities for employment. It seems to me very right and just that they either be financially discharged or some provision made for them during "unemployment".

Sir:

The works of the Nevada Sulphur Co., from whom I received the sulphuric acid used at this Mint, were destroyed by fire some time since, ^{and} the contract which expired in November last was not renewed.

To enable me to resume parting operations, I invited bids from acid dealers, ^{and} the Lyon Mills ^{and} Refining Co. were the only parties to respond.

They propose to furnish this Mint with sulphuric acid ^{and} take the solution resulting from the Refining operations, upon the following terms, viz:

If this Mint continues in operation

for two or three months only, they will furnish what sulphuric acid may be required at four (4) cents per pound, and will pay for the solution at the rate of seventeen (17) cents per pound for each pound of metallic copper used.

In the event that the Refinery should be constantly engaged, they will contract to furnish acid, for one year, at three ^{and} one half ($3\frac{1}{2}$) cents per pound, and pay for the solution at the figure above named.

I would respectfully recommend that you approve of the foregoing.

Sir:

I transmit this day, per Registered Mail, One (1) Box containing 288 standard Silver Dollars, which I personally took out of 96 Sacks of coin of \$1000.- each, in compliance with your request contained in letter dated 21st ultimo. I took one piece from the top, one piece from about the Middle, and one piece from the bottom and placed them in separate envelopes which I marked and sealed.

There is now on hand of the coinage of July, August and September 96,000.- standard Silver Dollars, out of a coinage of \$234,000.-, the difference \$138,000.- has been paid

SUPERINTENDENT'S OFFICE,

Nov. 6th, 1880

paid to Sellers of Bullion, and shipped in payment of Transfer Orders of the Treasurer of the United States.

The remaining Sacks of the Coinage of July, August and September, I have sealed and none have been paid out since your telegram of prohibition -

The Assayer of this Mint is preparing a detailed Statement showing the Finenesses at which Silver Melts have been passed by him during the past 18 months, and some other statements which I will transmit to you in a day or two -

I have made a careful investigation and search to ascertain where the error lies, and

The Mint of the United States at Carson, Nevada,

and I am unable to discover that there is anything wrong here.

The Assays are made by the same Assistants and Workmen who have been employed in this Mint for many years and I am satisfied that great care and precaution is observed.

I thought mistakes might occur in the Ingot Melting Room but there, also I find that the operations are conducted in a careful and workmanlike manner.

I yesterday forwarded to your address two pieces of Proof Silver for Assay, and I am anxious to learn the result of your tests of the same.

In conclusion, I beg to

ASSAYER'S OFFICE.

Nov. 12th. 1880

Hon. James Crawford
Supt. U.S. Mint

Sir:-

In compliance with your request I have the honor to report that the assay of Silver Ingots is conducted in the following manner. The samples of each melt are received from the Melters & Refiners (in the form of granulations) in two papers marked respectively "A." & "B." and the number of the melt. From these we weigh a sufficient amount to make the proper assay. Should they not agree the assay is made over and when we are perfectly satisfied that it is correct, we either pass or condemn - on the granulations. This is the only check

The Mint of the United States, at Carson.

the assayer has on the different melts of Ingots passed to the Coiner.

We have always endeavored to keep the granulations as near .899, as possible the limits being .898 to 901.5, (the legal variation being .897 to 903)

In all our assays of chips from Ingots, Blanks from melts, &c we have found each one inside of tolerance and as we have passed more melts over .899 than under, I can hardly see how it is possible that our coin should run under the tolerance.

We all know that there is great segregation in Silver Ingots, and I am only surprised that when the Carson Mint passes above 900 and the Phila.

The Mint of the United States, at Carson.

and San Francisco Mints pass under, that the Carson coin should not be above tolerance instead of below.

The San Francisco tests and the annual assays at Phila. have always proved our coin to be equal in fineness with the other mints.

I enclose a copy of assays of granulations from Jan. 1st 1879. to last of Sept. 1880, also assays of different melts of Ligots (granulations, chips, & coin) taken in November 1880.

Respectfully

W P Prescott

Referring to your letter bearing date of 2nd instant, I desire to say that the amount expended for Contingent Expenses during the fiscal year ended June 30th, 1881 aggregates the sum of \$22,649⁸⁶-, agreeing with your Statement.

The difference in my Account is explained as follows, viz:

Voucher 4285 January 31st, 1881 Bill of James Crawford for Traveling Expenses \$83.⁵⁰-
a disallowance of \$33.⁵⁰- is made on account of Railroad Fare paid the C.P.R.R. Co., and I was under the impression that you had made some arrangement for the re-payment by the C.P.R.R. Co., and hence did not

In the amounts paid at the Treasury Department on account of Contingent Expenses of this Mint, I erroneously charged the sum of \$6.⁰² and duplicated a charge of \$8.³², and the last payment made by the Treasury Department, \$15.⁹⁵, the advise of the same did not reach me until after my accounts had been made up and forwarded.

I would respectfully urge that some steps be taken by you to reimburse me for the amount paid the U. S. R. R. Co. on account of Fare from Reno, Nevada to San Francisco and return, on official Business,

In compliance with your request of Nov. 18th, with regard to the loss in the Gold on sale of sweeps, I have to say that, as the exact loss in the workings of the Refinery cannot be determined, I would suggest that the same be charged as follows:

The loss during the years 1878-9 was \$229.56, of this loss I think the sum of \$45.91 should be charged to Parting and Refining Expense account.

The loss during the years 1879-80 was \$480.61, of this loss I think

Hon. James Crawford,

Superintendent &c.,

Sir:

I herewith inclose samples of proof silver, marked No. 1 (15 ozs) and No 2 (20 ozs), also 10 ounces proof gold, which I respectfully request that you forward to the Mint Bureau for verification. -

The silver No. 1 is of the year 1846, said to have been checked at the Philadelphia Mint at the time it was made, and reported 1000 fine. No 2 is of a new lot, made in January, 1881, which I am now using for humid proof.

I would call your attention to the

2
at of the San Francisco Mint, under
date of 31st ultimus, upon the fineness of the
silver no. 2, which is given as 1000.

The sample of proof silver reported ^{up}
by the Assayer of the Mint Bureau ^{and}
others, as 999 1/2 fine, under date of the
4th instant, was, I am informed, from a
lot made about two years ago, ^{and} was
used for proof after that marked no. 1.
had been consumed, with the exception of
a small quantity which was reserved as a
check.

It is safe to say that this proof, reported
999 1/2, was in use during the two years pre-
ceding the first instant, when I changed
to the new lot, marked no. 2.

This, in my judgement, would fail to
account for the great variation from standard

ad in the coins of this Mint for the first three months of the present fiscal year, as the report upon silver Dugots could not thereby have been affected to exceed the half thousandth which the proof is reported to be short in fineness; more especially, when we have been correct during the months of October^{and} November, 1880, according to the reports upon the special test coins for those months.

Within the current month I have had several samples of my silver Dugot granulation checked at the San Francisco Mint with good results, the difference between our report^{and} theirs, being trifling.

Assays of blanks from our Dugots made within the past week, show an increase in fineness of one half to one thousandth,

over assays of granulations of Ingot
from which such blanks were taken.

Thus, an Ingot melt reported 899, about
the fineness I aim at, gives a blank of
the fineness of 900.

Sir:

Replying to your letter under date of 7th instant, I beg to say that the only additional parting charge that is or can be imposed, and which I supposed was required to be made at all the Mints and the New York Assay Office, if the Rules and Regulations were at all complied with, was the one (1) cent an ounce additional charge on parting Bullion containing over 100 ~~th~~ Base Metal.

See List of Charges herewith enclosed.

The only suggestion that I can make to you about the charges is contained in my letter of the 2nd instant.

Office of Superintendent,

San Francisco, Cal.,

July 3^d 1876

Prof. L. C. Rogers
Sir

In Compliance with instructions received from You on the 24th ult., I visited the Mint at Carson City, and superintended the Annual Settlement of that Institution on the 30th ult., a full statement of which is herewith submitted. I also examined the Condition of the Ordinary fund, and found the amount of currency on hand to agree with the balance as shown by the Superintendents books. The bullion Settlement was complete and satisfactory, and believed to have been the best ever made at that Mint.

Very respectfully,
W. B. David

The Mint of the United States at Carson, Nevada,
SUPERINTENDENT'S OFFICE,

June 19, 1882.

Hon. H. C. Purchard,
Director of the Mint,
Washington, D. C.,

Sir:

I transmit herewith a
copy of letter from the assayer of
this Mint, relative to the extraordinary
segregation that takes place in silver
ingots.

I have also thoroughly investigated
this matter without, however, ar-
riving at any satisfactory results.

Very Respectfully,

The Mint of the United States at Carson, Nevada,

SUPERINTENDENT'S OFFICE.

June 16, 1882.

James Crawford, Esq.,
Supt U.S. Mint,
Carson, Nev.,

Sir:

I respectfully desire to make
the following report upon test assays
of blanks from silver ingots, ^{and} call
your attention to the extraordinary segre-
gation therein shown; that the subject
may be investigated, ^{and} if possible, corrected.

May 14- Silver ingot melt No. 471,

granulation assay reported 898.8,

a blank cut from the point of an ingot
of this melt assays 898.3; from top of
same ingot 902.7

The Mint of the United States at Carson, Nevada,

SUPERINTENDENT'S OFFICE,

1883

I forwarded to Dr. Lawver, the Mint
Bureau assayer, samples of granu-
lations ^{and} a portion of each blank. His
results on same were: Granulations,
898.4; point, 898.6; top, 903.2

May 20th - Melt No. 482 - Granula-
tions, 898.8; point, 898.1; top, 901.7

June 1st - Melt No. 510 - Granula-
tions, 892.2; point, 898.5; top, 901.8

June 4 - Melt No. 546 - Granulations,

the discovery of this last blank, I request
that you furnish me fifteen pieces
from the delivery of ingots from which
it came; the delivery consisting of
five melts, reported: 900.2 - 900.4

As in the preceding case (Melt No. 546 - June 7th), you allowed me to draw ten pieces from the delivery of seven melts of ingots, of which No. 540 was one - the entire lot having by then been cut.

The seven melts reported, 899.1 - 899.5 - 899.5 - 900.2 - 899.3 - 898.4 - 899.6.

The ten blanks drawn resulted as follows: 900.2 - 900.9 - 899.1 - 900.9 - 898.3 - 902.4 - 900. 900.2 - 900.6 - 899.8

The only theory I can advance in explanation of this excessive increase in the fineness of coin blanks over the fineness of granulation samples

188

of ingots, lies in the strange behavior of the refined silver employed in the manufacture of ingots.

During the past year or more, in a number of instances, the top ^{and} bottom samples have varied to the extent of .004, necessitating remelting, ^{and} in a few cases, a second remelting to give a reasonable agreement.

In other instances the Melter ^{and} Refiner has made such fine silver into lengthened bars, a little above standard, the granulation samples then giving good results.

The Melter ^{and} Refiner informs me

The Mint of the United States at Carson, Nevada,

SUPERINTENDENT'S OFFICE,

, 1888 .

that his practice is to have the moulds warmed before casting the first melt of ingots in the morning, ^{and} to have the moulds changed during the day to prevent their becoming too hot.

In fact, so far as I know, every precaution has been taken to get good results.

The tendency of blanks is upward in almost every test, of which I have probably made more than one hundred — possibly two hundred — during the past six months.

The greatest decrease in fineness of blanks, of which I have observed, is little more than .0005 below the

The Mint of the United States at Carson, Nevada,

reported fineness of ingot.

I will cheerfully give such further
attention to this subject as you may
desire.

Referring to your letter dated 28th ulto.
in relation to certain charges imposed on deposits
for fine silver bars during January and February, 1883,

I desire again to call your attention to my
letter dated 19th ulto., wherein I state that one
of the charges imposed on deposits for fine silver
bars was the additional charge of $\frac{1}{100}$ of 1 cent
per ounce gross, and that the sum of \$13.⁷⁶
was erroneously deposited as charges collected
other than parting and refining -

I do not refer to the "fine bar charge"
at

at all -

The fine bar charge of $\frac{1}{4}$ cent an ounce
was imposed, collected and properly deposited.

The \$13.⁷⁶ properly belongs to Parting
and Refining., shall I take this amount
up in my Bullion Accounts for the current
quarter charging my "Profit" and Loss Account
and crediting "Parting" and Refining?

Sir:

Replying to your letter dated
24th ulto. in relation to the pair of shoes
required for the beam of the Ajax Press,
I enclose herewith the Drawing made by
Messrs. Orr, Fess and Morgan, and beg
to call your attention to an apparent
difference of $\frac{1}{8}$ in the measurements,
see sketch marked $\frac{1}{2}$ 4 Centrs to Centrs $8\frac{7}{16}$
and sketch marked $\frac{1}{2}$ 1 Centrs to Centrs $8\frac{9}{16}$,
their letter states that the measurements
should be alike, please explain this
difference

difference and return the Drawing to me.

I also enclose herewith a Drawing showing the Beam as it now is, you will observe that the measurements of bridle centre to centre is $8\frac{9}{16}$ and centre to centre of beam $8\frac{7}{32}$.

Please cause to be made and finished One pair shoes to fit the Beam, and also have new Pins made and forward with the shoes, the same to be hardened and ready for immediate use.

The Steel Block under Wedge in sketch marked $\frac{1}{2}$ is defective.

Our Machinist tried to harden it but failed, please enquire of Messrs Orr, Mess^r Morgan if a shoe can be put

SUPERINTENDENT'S OFFICE,

June 16th, 1888.

Sir:

Referring to your letter dated 8th inst. in relation to certain errors in my Bullion Accounts for the quarter ended March 31st, 1888.

I desire to say that silver purchase made January 11th Receipt 1st 14 H. H. Cowan, a refining charge of \$15.⁰⁰ was properly imposed, but the Abstract Clerk erroneously entered it on the Abstract Sheets as a Melting charge, and consequently it was credited to Profit and Loss Account -

Respecting the additional charge of $\frac{1}{10}$ of 1 cent per ounce gross, amounting to \$13.⁴⁶, imposed on fine silver bar deposits, the same was also erroneously credited to Profit and Loss %
I shall in my Bullion Accounts

The Mint of the United States at Carson, Nevada,
SUPERINTENDENT'S OFFICE,

June 16th, 1883.

for the current quarter credit Parting and Refining and charge Profit & Loss Account with the amount of \$28.⁰⁰

I would respectfully suggest that you deposit Certificate of Deposit No 1007 for \$26.⁰⁰ now in your hands to the credit of Parting and Refining, this will still leave a balance of \$2.⁰⁰ to be deposited to the credit of that Account.

Respecting the \$33.⁰⁰ charges erroneously imposed on deposits for four silver bars, I desire to say that I have drawn a Special Warrant and made a repayment to the depositor of that amount and charged Profit and Loss Account with the same.

The Mint of the United States at Carson, Nevada,

SUPERINTENDENT'S OFFICE,

June 16th, 1883.

In relation to Gold Deposit 4th 19
made March 14th, 1883, by C. D. Lupton,
the parting charge imposed was not 4
cents an ounce as you state, but 4 1/2
cents an ounce was properly imposed.
(See Regulations, page 6, parting charge on
bullion containing 400 ~~to~~ to 699 1/2 ~~to~~ gold
4 cents and over 100 ~~to~~ base metal 1/2 cent
additional.)

I, Carrie E. Hayward
do solemnly Swear that I have never voluntarily borne
arms against the United States since I have been a citizen thereof; that I have voluntarily
given no aid, countenance, counsel, or encouragement to persons engaged in armed hostility
thereto; that I have neither sought, nor accepted, nor attempted to exercise the functions of,
any office whatever under any authority or pretended authority in hostility to the United
States; that I have not yielded a voluntary support to any pretended government, authority,
power or constitution within the United States, hostile or inimical thereto. And I do
further Swear that, to the best of my knowledge and ability, I
will support and defend the Constitution of the United States against all enemies, foreign
and domestic; that I will bear true faith and allegiance to the same; that I take this obli-
gation freely, without any mental reservation or purpose of evasion; and that I will faith-
fully and diligently perform the duties of the office of Adjutant

Sir:

Replying to your letter under

to two overpayments in my 'Silver
Purchase' statement for the month
of June, 1882, I desire to say that
the purchase of June 28th, G. D. Mills,
909.42 ozs, at 1.13³/₄, has been changed
and carried out \$1.034.81, instead of
\$1.034.⁸³

The item of June 29th, W. B. Cowan,
58.37 ozs @ 1.13³/₄, carried out \$66.⁶⁴,

was erroneously transcribed ^{and} should
read 58.⁵⁷ ozs @ 1.13³⁴ - \$66.⁶².

This makes the total value of the
fine silver purchased during June,
1882, \$80.902.²⁴; ^{and} total value of
silver purchased parted from Gold,
is \$167.⁹², which makes a grand
total of \$81.040.16.

Mr Edward D. Luxton has furnished
the following

P. O. Rye Patch, Nev., Feb. 5 1883.

James Crawford, Esq.
Supt. of Carson Dist.

Humboldt County -

My dear Sir:

In answer to a request of 4th ultimo, I send the
following -

Indian District is located on the Mineral belt known as
the Black Hawk range, which extends from the Humboldt
River, near Mill City, a distance of about fifty miles, and
abounds in Gold, Silver, Copper, Lead and Antimony -

Why this valuable extent of territory has been overlooked
and neglected by Miners and Capitalists I am at a loss to
understand, better prospects of good mines, very many of
high grade ore, cannot be found in the State -

The few properties upon which money has been expended
have been remunerative, and would continue to be so, if
Mining was conducted on economical and true business
principles - Upon this belt is located the Sheba, See Soto,
Arizona, Evening, Friendship, Moonlight, Sunlight, Black
Hawk, Concord, Eagle, Eureka and other claims equally
valuable -

The richest silver ore ever found in the State was taken from
the Moonlight Mine in 1870-1. This mine was patented and
sold in 1872 to a ~~wealthy~~ gentleman in San Francisco, and
since that time not one dollar has been expended on it,

in fact, not one of the above mentioned properties has been really developed, and in no instance below a depth of two hundred feet. The eleven millions in ore said to have been produced by the Arizona, the six millions by the Shesha and other properties, were all taken out within two hundred feet of the surface, that is simply worked for the ore in sight. Pumping apparatus would be required in many of these mines to sink deeper -

The Vandewater Gold and Silver Mining Company, organized under the laws of New York, owns the Eagle, Troy and other claims on the south side of Spring Valley Canyon, and is the only Company Mining and Milling in Indian district. This company has a fifteen stamp mill, two hoisting works and during the last year has constructed a double compartment shaft, run three hundred feet of tunnels and developed several large bodies of ore, some of which is free milling and is worked in the Company's mill, but a large percentage of the silver ore will require roasting or smelting for which there are no facilities in this district -

It is the intention of some gentlemen familiar with the wants of this district to erect a small smelter the coming summer, on a location near the Vandewater property. The greater part of the ore on this Mineral belt is refractory and the profitable must be worked on the ground until the Central Pacific

R. R. tariff - is more reasonable than at present -

In the immediate vicinity of the Vandewater mines are ⁽²⁾two gulches called Spring Valley Gulch and Dry Gulch from which upwards of \$900,000 in Gold dust has been taken by Chinamen, these Placer diggings extend to all the gulches upon this belt, the work is done in Rockers, the water being scarce, yet notwithstanding this disadvantage good wages can be made, ~~but afford greater opportunities for capital~~ I know of no territory ^{more inviting to investors} ~~affording greater inducements to Capital~~ than this part of Humboldt County, easy of access, within twenty miles of Rye Patch; and twenty six miles from Mill City, both on Cen. Pac. R. R. The climate is unsurpassed, the water good, luxuriant grass for stock, and rich mineral float in every direction, inviting development, ~~that could be desired,~~

Yours very truly
Edward D. Luxton
Supt

W.B. The above is obtained from the best information I can get, you will of course make any corrections and changes that suggest themselves to you -
You might get information of the Humboldt Queen Mine from Capt. J.W. Mills, Rye Patch, Nev. - ^(Humboldt Queen is not in this district)

P.S. The bellino return has been twice made by
L. R. Dunn in my absence - once to San
Francisco - and once by your office I think -

In answer to your letter under date of the 5th instant I desire to say that the cost of introducing the Purross Boiler Cleaner here, will be about \$400. The Cleaner has ~~been~~ attached to our Boilers for nearly three months, and its constant use will result in a great saving of fuel, in addition to keeping the Boilers clear.

I did not name the cost in my former letter because I had heard that you

Replying to your letter bearing date 26th ultime, in relation to the erroneous charge of one dollar for Melting imposed on Deposits of Gold Bullion, requiring parting and refining,

I desire to say that, it has been the custom of the Assayer to report the charge upon the Memorandum or Assayer's Report as a Melting charge, instead of the addition to parting and refining of so many cents per ounce gross, and consequently the several Clerks calculated and entered it on the Abstract Sheets as a Melting charge -

The subjoined statement will show the amounts erroneously deposited as other than

Sir:

Replying to your letter bearing date 12th instant, I beg to say that the sum of \$18.⁰⁰ of Certificate of Deposit No 814, on account of charges other than parting and refining for the month of March 1883, properly belongs to the Earnings of the Refinery, being the additional charge of one dollar per deposit.

I would respectfully refer you to my letter bearing date 5th instant which contains a detailed statement of the amount erroneously deposited to
the

Dear Sir:

We are in receipt of your favor
of yesterday, ^{and} we note contents.

The patents under which the Purvess
Automatic Boiler Cleaner is manu-
-factured are, to the best of our knowledge
^{and} belief, valid ^{and} regular. We know of
no process of law or decision of any au-
-thority which disputes their validity, ^{and}
we do not recognize any reliability in
information which is unaccompanied
by some evidence of the legality of the
inventor's claim.

Personally, we would say that we
never heard of any question of the matter
until after your machines had been

delivered ^{and} paid for, ^{and} then only through
an irresponsible printed circular shown
us by Supt. Burton of the San Francisco
Mint.

The owners of the Purvess patent are
responsible, ^{and} will fully protect the
rights of purchasers of their machines.

Sir:

I enclose herewith a report of the Assayer of this Mint exhibiting finenesses of the Condemned Standard Silver Dollars, after being remelted into Ingots.

By reference to this report it will be seen that, of all the coins condemned and remelted, only 1 Melt $\frac{1}{2}$ 22 (consisting of about \$2000.-) was below the legal tolerance, reporting 896.874.

I am impressed that either 1 or 2 Melts were passed by the former Assayer, or in some manner unknown to any one were worked, which were below the legal tolerance, and it unfortunately happened that the
pieces

The Mint of the United States at Carson, Nevada,

SUPERINTENDENT'S OFFICE.

pieces from these Melts were selected for Assay.

I will add, that, the Melter^{and} Refiner reports to me that the loss in remelting this coin was $170.\overset{81}{81}$ ounces standard silver bullion, and in the event his silver loss should prove to be apparently excessive at the Annual Settlement, this will explain it.

March 27th 1882.

Sir:

The establishment of a Telephone line between this City, Virginia City and intermediate points is projected, to which I desire to subscribe, as I believe it would expedite the business of this Mint with the Quartz Mills and other Institutions with which we have transactions, in that direction.

The expense attached thereto is trifling, there will be a royalty charge of \$25.- per annum, and the first year a charge of \$25.- for cost of instruments. The rental for the line will be \$60.- per month, to be divided among all participants. At present the rate for this Mint would be \$15.- per month, but so soon
as

The Mint of the United States at Carson, Nevada,

SUPERINTENDENT'S OFFICE,

as others begin to use the line the rate would
be reduced.

All participants are required to agree
to use the line for at least one year.

Upon receipt of this please telegraph
me your authority.

Very Respectfully,
James Crawford

Carson City, Nev.

July 7th 1873

Sir,

With reference to dealing with fractions in rating the fineness of Gold and Silver Bullion, by letter of the Director of the Mint under date of 7th June, it is directed that the practice of the Philadelphia Mint be followed by this Mint. That practice is thus stated by the Supt. Hon. Jas. Pollock -

"When the assay is 998.8 we do not feel justified in making it more than 998.5"

In a further letter dated 16th June 1873 the Director of the Mint again refers to the subject and says "Your Assayers must comply with my recent instructions, viz; that the assay must come fully up to the half thousandth, if not it must be dropped." In reporting your assays you will in all cases drop the fractions, when they do not come fully up to the half.

To Mint Hopkins Esq }
Assayer }

Respectfully
(Signed) Frank B. Nettrick
Supt.

Treasury Department,

OFFICE OF THE DIRECTOR OF THE MINT,

June 24, 1874.

The Parting charge at U. S. Mint Carson,
Nevada, on Silver Bullion containing one
thousandth to two hundred and ninety
nine and a half thousandths Gold, is
herely fixed at two cents per ounce gross.

Acting Secretary of the Treasury.

Carson Mint Matter Continued

Letter from R. M. Daggett House of Representatives,

Washington, D. C., May 8, 1880.

Friend Oliver:

I have inquired at the Department, and find that the discharges referred to were not ordered from Washington, but were made on Mr. Crawford's own volition. I was further informed that the order for the re-opening of the Mint did not reach Crawford until after the dismissals occurred. The petitioners asked either for relief or discharge from service, and as the Department declined to grant the first, Mr. Crawford accorded the last. This is the way it is looked at by the Director, and he refuses to interfere in the matter.

Senator Jones is not in the city today, and when he returns I will join with him in a request to Crawford to reinstate the dismissed force

as far as possible. While we are struggling to keep the Mint ^{open} and secure a coinage appropriation for it for the next year, it will not do to kick up much hell about its management. This you can see as well as I can. Stanton Jones and myself will write to Crawford, and see what can be done.

Yours sincerely
W. M. Daggett
